ANALYSES:

MR

- Angiogram brain
- Brain
- Brain stroke protocol
- Venogram entire head

CT

- 3D head
- Brain
- Brain stroke protocol
- Perfusion with contrast CBF
- Soft tissue neck
- Temporal bones
- Venogram head

(Analyses available for many studies with or without IV contrast)

Custom measurement protocols available

ABOUT PRECISION IMAGE ANALYSIS (PIA):

Precision Image Analysis is a world class provider of cloud-based, advanced medical 3D image post-processing and data analysis. PIA serves the global healthcare and research communities through remote image post-processing analysis and reporting services.

The company's solutions offer an excellent opportunity to avoid software and hardware capital expenditures while incorporating advanced image quantification at reduced cost and increased quality with exceptional standardization, reproducibility and turnaround times.
